We have electrical wires for wiring speakers and speakers per se inside clothing. They are classified in 381/333, 388. I did not see in either the specification or the claim defining that the electronic device is a speaker. Thanks, Sinh

Could I get a search from class 381 for application 10568437. Much of the art I'm finding has 381 listed. I'm in electrical connectors.
